

**Project Design Phase-I**  
**Proposed Solution**

Team ID	PNT2022TMID32618
Date	06 October 2022
Project Name	Project - Plasma Donor Application
Team Members	4

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The requirement of plasma became a high priority and the donor count has become low. Saving the donor information and helping the needy by notifying the current donors list, would be a helping hand. An application is to be built which would take the donor details, store them and inform them upon a request.
2.	Idea / Solution description	Creating web applications with UI to interact with the user for getting the donor details and providing them upon the recipient's request.
3.	Novelty / Uniqueness	It is a reliable platform to connect local donors with patients and helps ensure the best use of your valuable contribution.
4.	Social Impact / Customer Satisfaction	By using this application, we can get respective donors in an emergency situation
5.	Business Model (Revenue Model)	This model doesn't need any cost of expenses and can be easily used.
6.	Scalability of the Solution	This application can handle many numbers of users by either raising a request for plasma donation and requirement.
